forgotten modern reveals the work of the innovative architects building in california from the 1930s to the 1970s with groundbreaking and illuminating examples that will alter the way we think of california architecture hess and weintraub focus on those that exemplify early mid entury modern variations on minimalism and organic architecture though architects historians and the public alike have overlooked many of these superb architects from california s past century this book intends to bring them back to our attention all the architects included here are important in helping to show the breadth of design that styles like organic were more widely represented than we have previously realized and that the fertile soil of california design fostered a wide spectrum of remarkable ideas even if not all developed a significant school of followers chapters include a new introduction to midcentury california searching for midcentury modern variations on wood and steel modernism organic architecture history plus modernism

the book that helped spark the retro craze for fifties architecture and introduced the term googie to the world is back first published by chronicle in 1986 this key survey of mid century coffee shop and commercial architecture is still the standard work on the subject googie redux is a thoroughly revised and expanded edition of the classic and perennial top selling book that rekindled the craze for 1950s coffee shop and commercial architecture long derided by critics as popular folly the style so named after john lautner s eccentric los angeles coffee shop was emblematic of southern california s car oriented architecture by the time of the first edition s debut these buildings were being demolished by the score alan hess 1985 chronicle book did much not only to educate legitimize and popularize the style that characterized this endangered architecture but it helped spark a resurgence of interest into midcentury modern design completely revised and significantly expanded in both text and images some of them recently unearthed for this edition this redesigned package features is still an entertaining and informative look at the rise fall and resurgence of the commercial architecture that changed the american landscape includes a greatly expanded guided tour of the iconic buildings in southern california

architecture

robert venturi partner of the philadelphia firm of venturi rauch and scott brown is probably best known for his writing on architecture published during a time of growing discontent with modern architecture venturi s and denise scott brown s writings helped to redefine architectural design by emphasizing issues like history language form symbolism and the dialectics of high and popular art in their architectural projects venturi and his partners have refined a clear design vocabulary through ordinary and conventional building techniques this was demonstrated early on in the controversial guild house and has been artfully expressed in the more recent critically acclaimed gordon wu hall the microbiology building at princeton university and in the yet to be built extension to the national gallery in london von moos s text amply illustrated meticulously describes and catalogues the firm s evolution and work this book should provide a valuable reference to the work of a uniquely american firm from book flap

traces the transformation of commercial development as it has moved from centralized main streets

out along the street car lines to form the miracle miles and shopping malls of today also explores the evolution of roadside buildings back cover

fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects in this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects including designs by le corbusier eileen gray frank lloyd wright robert venturi frank gehry peter eisenman richard meier and kazuyo sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field the data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture through this process the book offers a unique mathematical insight into the history and theory of design

in this text ford offers an account of the relationship between urban architecture especially vernacular architecture and the spatial arrangement and development of cities in north america from office towers in the central business district to commercial strips in the edge city ford shows how changes in the built environment parallel changes in urban economies and human culture focusing on ordinary structures rather than famous landmarks the book aims to provide a guide to understanding the changing character of any urban landscape

peter hall s seminal cities of tomorrow remains an unrivalled account of the history of planning in theory and practice as well as of the social and economic problems and opportunities that gave rise to it now comprehensively revised the fourth edition offers a perceptive critical and global history of urban planning and design throughout the twentieth century and beyond a revised and updated edition of this classic text from one of the most notable figures in the field of urban planning and design offers an incisive insightful and unrivalled critical history of planning in theory and practice as well as of the underlying socio economic challenges and opportunities comprehensively revised to take account of abundant new research published over the last decade reviews the development of the modern planning movement over the entire span of the twentieth century and beyond draws on global examples throughout and weaves the author s own fascinating experiences into the text to illustrate this authoritative story of urban growth

from citrus trees to spring breakers transforming the irvine ranch tells the story of orange county s metamorphosis from 93 000 acres of farmland into an iconic southern california landscape of beaches and modernist architecture drawing on decades of archival research and their own years at the famed irvine company the authors bring a collection of colorful characters responsible for the transformation to life including ray watson whose nearly century long life took him from an oakland boarding house to the irvine and walt disney company boardrooms joan irvine smith a much married heiress who waged war against the us government and the irvine foundation s reactionary board and won william pereira the visionary architect whose work became synonymous with the la cityscape spanning the history of modern california from its gold rush past to the late 1970s transforming the irvine ranch chronicles a storied family s largely successful attempts to remake the vast irvine ranch in its own image

in 1991 nevada s commission for cultural affairs was created to oversee the preservation of the state s historic buildings and the conversion of the best of them for use as cultural centres working closely with local groups and drawing on both public and private resources this program has rehabilitated dozens of historic structures treasured by their communities for the ways they represent the development of the state and its culture nevada s historic buildings highlights 90 of these buildings describing them in the context of the state s history and the character of the people who created and used them nevadans themselves had a say in which buildings were picked

with specially commissioned colour photography this is a re evaluation of the great buildings of oscar niemeyer these are the buildings niemeyer himself considers his most important work including works in brazil france italy and algeria

landlocked arid and infertile nevada is one of the least hospitable regions in the united states although it is dominated by its wild landscape nevada boasts a colorful human history and a rich architectural heritage this volume the newest in the acclaimed buildings of the united states series offers a comprehensive tour of nevada s highly distinctive architecture from old ghost mining towns to the las vegas strip pioneer forts to mega casinos the silent majesty of the hoover dam to the quirkiness of drive in wedding chapels organized by region the book is a fascinating survey of more than 200 historic sites including churches courthouses schools homes historic railroads copper mines forts hotels and more detailed descriptions set all of these diverse forms of building into social political historical and stylistic context featuring 250 original photographs maps and drawings this extraordinary volume is the most complete guide of its kind

an unsung prophet of today s green movement in architecture frank lloyd wright was an innovator of eco sensitive design generations ahead of his time an architect and designer of far reaching vision it is not surprising that frank lloyd wright anticipated many of the hallmarks of today s green movement across his work which stands upon a philosophy wright termed organic widespread evidence is seen of a refined sensitivity to environment to social organization as impacted by buildings and to sustainable and sensible use of space the desire to work and live with nature to create livable homes and cities is an ongoing theme of american architecture and planning this book explores wright s lessons on how climate sustainability sunlight modern technology local materials and passive environmental controls can become the inspiration for excellent design and highlights a selection of wright s buildings to show how he dealt with these issues the book is organized by the green concepts wright used including passive solar design and the use of thermal massing passive berm insulation environmentally sensitive landscaping passive ventilation systems passive natural light and intelligent and artful adaptation of technology with examples from different houses it shows how wright evolved certain ideas that continue to spur discussions of green architecture design today
